

Summary of feedback from conference questionnaire

On the whole, attendees rated the event as 'very good' to 'excellent'. In particular delegates liked the Zing software and discussions, speaker's presentations and the opportunities for networking with a variety of delegates (example responses, "Zing technology excellent, helped encourage discussion"; "A good mixture of presentations by researchers/schools/specialists" and "Opportunity to hear/discuss ideas from people with different educational/business/academic experiences").

The main aspects attendees disliked about the event were the type of food available at lunch and the length of time for lunch (example responses, "Lunch could have included more healthy options" and "Slightly too long for lunch").

Action Point

The issues surrounding the food available and the timing of lunch have been recognised and although for this particular event there was a restraint in terms of food availability at the venue, the conference organisers will be taking this into consideration for future events.
